Javediqbal8381@gmail.com

Web developer equipped with substantial experience in full stack web development, I am eager to utilize my expertise to contribute to meaningful projects and deliver exceptional results. My strong technical skills, attention to detail, and passion for problem-solving allow me to excel in creating efficient and user-friendly web applications.

Experience

10/2022 to now

Web Developer
Tech Emulsion software house, Peshawar kpk

- Developed and enhanced the "Atarim" platform, a React SaaS application for client-agency collaboration.
- Implemented new features, including a full image annotation tool and bulk actions functionality for enhanced user experience.
- Created a robust notification system to keep users informed about task changes.
- Ensured the application's responsiveness across different devices.
- Optimized "Atarim" for improved performance using Redux.
- Designed and developed a lawyer consultation app with Zoom integration for seamless online consultations and payment processing.

10/2021 to 04/2022

Web development intern
BrainsPk software house, Swabi Kpk

- Started with a focus on React, working on various small tasks assigned by team leads.
- Gained hands-on experience in Firebase and developed mini UI applications.
- Progressed to Node.js and Redux , deepening knowledge of APIs and full-stack development.
- Polished and expanded skills by actively contributing to the company's projects.
